

Year One have settled very well into their new class by working **very** hard and having lots of fun.

This term we have:

- Identified and labelled the basic parts of the human body
  - o We did this in our books and using chalk outside
- We learnt about our senses and which body part they are linked with.
  - o We made poems and created booklets about our senses.
- We had fun learning about Autumn and Winter. We made lots of crafts and used our senses to identify the season.
- We experimented with lots of different instruments, creating our own music.

- We wrote instructions to help us to make our fruit salad by preparing and cutting up the fruit. We also made some chocolate truffles and baskets as a Christmas treat.

- We acted out stories to help us to understand the story in detail and look at the characters and their feelings.

We travelled in our time machine to meet different people through history. Our favourite was looking at the history of cars and making our own working cars.

- In science we looked at different materials and their properties.
- In December we got a visit from Mr Starshine, our class elf. Who had lots of fun activities and treats ready for us.
- We looked at basic number skills, measurement and 2D/3D shapes and their properties.
