

Information Evening

On Wednesday 4th March we held an information evening at the school to showcase the plans for the site and to answer any questions the general public may have. We transformed the school hall to recreate the patios and paths to help people visualise the site.

Some Year 6 children then volunteered their own time to show the public around the site and explained in detail the plans. They were praised for their enthusiasm and we received some very positive comments about the project.

We would like to say a massive thank you to everyone who attended and especially the Year 6 volunteers who gave up their time.

I think it's a wonderful idea and should enhance the environment of the station. I am very impressed with the enthusiasm shown by the pupils involved. The installation should be an asset to the community. **Dennis O'Brien**

Year 4, 2 and 6 were very imaginative. I'm looking forward to seeing the finished product. I just hope it stays vandal free. **Diane Tyms**

I am very proud of the children and look forward to future years to see more art work. **Jill McKenna**

If you would any further information about the project or have any questions then please contact school on 01695 423295 and ask to speak with Emma Stone or Chris Clare.
